true

DRAG the slider. The penguin says *true* when number 8 shows. That's the number that when added to 6 totals 14.

$$6 + 8 = 14$$

Dragging the slider is testing a value. Put the say ... block in a forever loop. You don't test just once, you keep on testing.

When you make a variable you can get a slider monitor. Set min to 0 and max to 10.
Write the number you see, when the penguin says "TRUE".

C. $7 + ? = 16$	D. $4 + ? = 15$
